purecycleengineering.co.uk

Pure Cycle (Engineering) Limited 4 Beaumont Road, Church Stretton, SY6 6BN, UK

Company Number: 11435890 VAT Reg. Number: 312182249

References:

The projects listed below have all been designed or supplied by PCE's in house team of fully qualified engineers. This list does not include small-scale projects such as 5-10 Tonne/hour paper, wood or plastics processing and recycling systems, and focuses on Waste to Energy projects.

Fibrefuels, Slough, UK.		
	Pre/Post Shredding and densification systems for handling post consumer C&I Waste streams to generate electrical power from RDF fuels.	2001
Castle Cement, Stamford, UK.	UK's first dedicated MSW reception, classification and processing to SRF "Profuels" Facility.	2002
Polysindo, Asia	750 Kg/h PET reprocessing line	2005
Ecomaster, Massafra, Italy	Design and supply of MT for MBT plant with drying tunnels to generate pelletised RDF	2004
Ebisushyro, Japan	120,000 Tonne/year MRF Residue to SRF Fuel production plant	2004-5
Diao paper, Japan	90,000 post consumer waste /MRF residue processing plant to generate SRF to feed into clients CFB boilers	2005
Ecosafe Ltd, Ireland	1 T/h hospital waste shredding system following autoclave sterilization system	2005
Bical Ltd, UK	Fuel Cuber full redesign, build and facility supply for cubing miscanthus for 'green coal'	2006
Hinkcroft, London, UK	MSW processing plant, with RDF production for 100,000 Tonnes/year of MSW input	2008
NPT, Swansea, Wales	400 Tonne/day MSW reception facility, with biodrying and fuel production of high grade SRF for CEMEX cement plants	2008
Stericycle, Bucharest, Romania	2 T/h Clinical/medical/theatre waste sterilization process for cement kiln fuel	2008-9
Niramax group, Hartlepool, UK	MSW, C&I and C&D waste processing plant for 240,000 Tonnes/year on two- shifts. Full classification and separation technology on site and high grade SRF produced, baled and wrapped	2009
Bredbury Parkway MBT plant, Manchester, UK	110,000 Tonne/year MRF facility, with AD plant and RDF production for Viridor.	2009
777 Demolition, London	100,000 Tonne/year RDF production facility, including pre-shredding, re- shredding, classification and truck load out	2010
Ragn Sells, Estonia	Dedicated MBT plant processing 140,000 Tonnes/year of Municipal waste, biodrying facility for organic materials and production of SRF for local cement kiln.	2011
Recydia, Turkey	2,000 Tonnes/day municipal waste processing plant, with high recyclates recovery and high grade secondary fuel stream production	2012
Opes Industries, Oxford, UK	140,000 Tonnes/year C&I/C&D reception facility, full scale classification and separation facility and RDF production (baled and wrapped) for fuel.	2014-15
Opes Industries, Oxford, UK	Additional modifications to facility to improve landfill quantities to less than 5% of input	2016
GJ Nature Care, India	Engineering consultancy to design and specify large MSW biodrying and MRF facility for power generation on site	2016- present
SSSI Ltd	Ongoing upgrades to existing site, including fines clean up, RDF to SRF upgrades and metals clean up	2018
Waste to energy funding group	Development of a 30,000 tpa single line demonstrator plant for SRF pellet production for the waste to energy industry, and the roll out of up to 8 larger scale plants producing circa 105,000 tpa of pellets.	2018-19
Equipo SP	Engineering consultancy for several European waste to Energy projects	2019
Tier 1 power utility client	Front-end waste to energy plant RDF handling/preparation. Consulting to deliver 3 waste to energy plants by 2021	2019
Waste to Energy Plant	Design and consultancy for a high volume medical waste processing, sterilisation, preparation, storage and feeding system for a gasification plant	2020- present
Waste to Energy Plant	Engineering consultancy for Front-end waste to energy plant RDF handling/preparation/feeding and ash handling systems	2020- present
